

**AMENDMENTS TO THE CLAIMS**

- 1.-6. (Cancelled)
7. (Currently Amended) A method for synergistically increasing the yield in glyphosate-resistant legumes, which comprises treating the plants with a mixture comprising
- (a) a compound of the formula Ia

in which

T is CH or N;

R<sup>a</sup> and R<sup>b</sup> are halogen or C<sub>1</sub>-C<sub>4</sub>-alkyl;

the phenyl group is in the 1- or 5-position;

x is 0, 1 or 2; and

y is 0 or 1;

and

(b) a glyphosate derivative II selected from the group consisting of N-(phosphonomethyl)glycine as a free acid or a salt thereof

in a synergistically active amount, wherein the weight ratio of the compound Ia to the glyphosate derivative II is from 1:1 to 0.01:1.

8. (Previously Presented) The method as claimed in claim 7, wherein the salt of N-(phosphonomethyl)glycine is selected from the group consisting of the

isopropylammonium salt, sodium salt, ammonium salt and trimethylsulfonium salt weight ratio of the compound Ia to the glyphosate derivative II is from 5:1 to 0.01:1.

9. (Currently Amended) The method as claimed in claim 7 ~~claim 8~~, wherein the mixture comprises:
  - (a) pyraclostrobin and
  - (b) a glyphosate derivative II.
10. (Currently amended) The method as claimed in claim 7 ~~claim 9~~, wherein component (b) is N-(phosphonomethyl)glycine as a free acid glyphosate.
11. (Previously Presented) A method as claimed in claim 7, wherein a fungicidal azole selected from the group consisting of: fluquinconazole, metconazole, prochloraz, propiconazole, prothioconazole, tebuconazole, epoxiconazole or myclobutanil is employed as component a) in addition to the active ingredient of the formula Ia.
12. (Currently Amended) A mixture comprising
  - (a) a compound of the formula Ia

in which

T is CH or N;

R<sup>a'</sup> and R<sup>b</sup> are halogen or C<sub>1</sub>-C<sub>4</sub>-alkyl;

the phenyl group is in the 1- or 5-position;

x is 0, 1 or 2; and

y is 0 or 1;

and

(b) a glyphosate derivative II selected from the group consisting of N-(phosphonomethyl)glycine as a free acid or a salt thereof

wherein the weight ratio of the compound Ia to the glyphosate derivative II is from 1:1 to 0.01:1 ~~5:1 to 0.01:1~~.

13. (Previously Presented) A mixture as claimed in claim 12, wherein the mixture comprises:
  - (a) pyraclostrobin and
  - (b) a glyphosate derivative II.
14. (Previously Presented) A mixture as claimed in claim 13, wherein component a) comprises an azole selected from the group consisting of: metconazole, myclobutanil, epoxiconazole, propiconazole, prothioconazole and tebuconazole in addition to the active ingredient pyraclostrobin.
15. (Currently amended) A mixture as claimed in claim 13, wherein the component (b) is a salt of N-(phosphonomethyl)glycine selected from the group consisting of the isopropylammonium salt, sodium salt, ammonium salt and trimethylsulfonium salt glyphosate.
16. (Currently Amended) The method as claimed in claim 9 ~~claim 10~~, wherein the weight ratio of the compound pyraclostrobin to the glyphosate derivative II is 1:1 to 0.1:1.
17. (Currently Amended) A mixture as claimed in claim 13 ~~claim 15~~, wherein the weight ratio of the compound pyraclostrobin to the glyphosate derivative II is 1:1 to 0.1:1.
